

THREE TIERED PRICING

Depending on the results of our first inspection, your charger installation will fall into one of three pricing estimations. This brochure will help break down the three tiered pricing estimates as you begin to understand the costs associated with an installation type. The reflected prices do not include hardware costs and are not inclusive of provincial sales tax (if applicable).

ROCKETEV CHARGING SOLUTIONS

WHO WE ARE

With a vision for a greener world, RocketEV is a key player in building a sustainable and practical network of EV charging stations nationwide. RocketEV prides itself on its ability to provide full turnkey solutions that are efficient, of high quality and economical. We aim to do this by leveraging our strengths, resources, technology and strategic partners to fulfill this complex project.

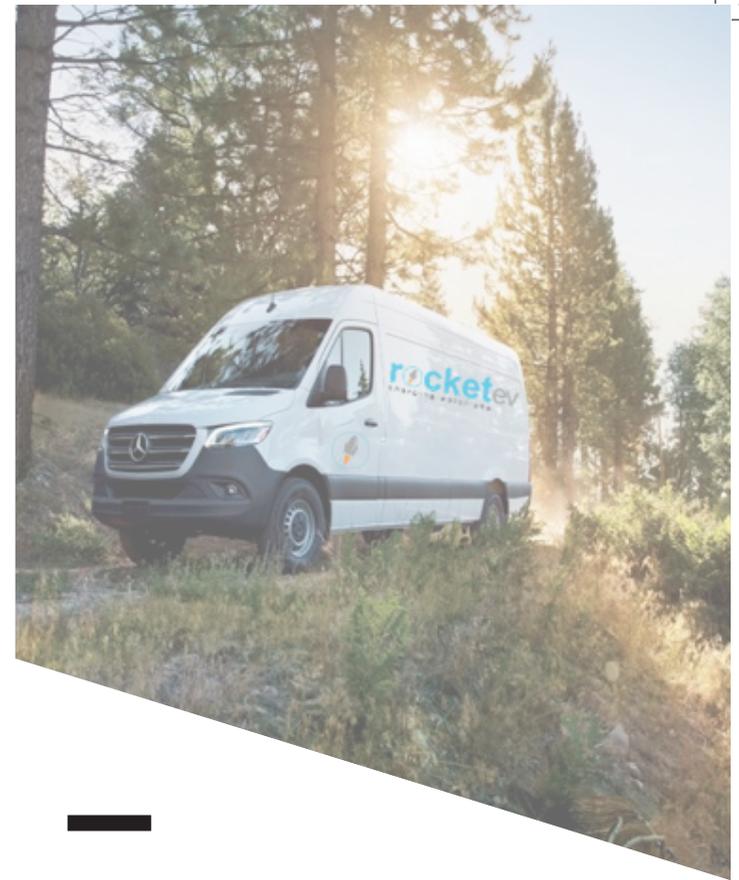

To get started with us, you just need to simply:

- Purchase your vehicle at the dealership.
- Book your install through our website.
- Determine your tier with our web tool.
- Wait for us to confirm your install date.

(1) Premium Flo unit - \$1249.00 (as of 11/2019)

(2) Premium ChargePoint unit - \$999.00 (as of 11/2019)

Prices are subject to change without notice.

FIND YOUR TIER

1 EV Ready Home - \$949
Includes delivery of station, mounting and inspection with existing 240v outlet

2 EV Ready Home - \$1599
Includes delivery of station, mounting and inspection with existing pathway to garage for conduit through-put.

3 Non EV Ready Home - \$1999
Any home that falls outside of the parameters of a tier 1 and 2 home, not previously designed for EV charging, requires additional upgrades such as conduit runs and outlet upgrades
